Flying W Ranch

Dear David,

Enclosed is your Grazing Year 2003 Annual Operating Plan/Instructions. Also enclosed is a copy of our monitoring calendar for the **Cox Canyon and Eagle Peak** Allotments. You are encouraged to participate in any monitoring that we do on the **Cox Canyon and Eagle Peak** Allotments. We will call you in advance of our monitoring trips to remind you. If you cannot make it, and you would like to participate, please contact us in advance and we will work with you on re-scheduling the trip. I have also enclosed information concerning several USDA programs that could provide drought assistance to eligible grazing permittees on National Forests.

As always if you have any questions or comments please contact Ted McArthur or myself.

Sincerely,

ROGERS M. STEED
District Ranger

Allotment: Eagle Peak and Cox Canyon

Permittee: David Westbrook

1. **Authorization:** Authorized to graze the following in 2003:

Number and class	Dates Authorized
185 Cattle (cow/calf)	3/1/01 to 2/28/02

2. **Management:**

Pasture	Time Frame	Comment
Wilson Pasture	3/01-4/14	This rotation schedule is flexible. As you determine what does and does not work we can work with you to develop a more appropriate rotation pattern.
West Half Cox Canyon	4/15-7/30	
East Half Cox Canyon	8/1-10/31	
Largo and Tularosa Pasture	11/1-1/15	
Juniper Pasture	1/16-2/28	

The 2003 grazing year will be an opportunity to implement the above management strategy and ascertain its effectiveness for long-term management of the **Cox Canyon and Eagle Peak** Allotments. Please notify us of cattle movements onto and off of the allotment, as well as refinements that may be needed to enhance the management system.

3. **Utilization Standards and Monitoring:**

Allowable use is the percentage of use that will be allowed on key grass and browse species. This use will be measured in the key monitoring areas for the **Cox Canyon and Eagle Peak** Allotments. The scheduled rotation, grazing season, and livestock numbers are indicated in Section 1 of these Annual Operating Plan/Instructions. **Adherence to utilization levels is mandatory and should be the limiting factor in adjusting grazing management.**

Adjustments in numbers, rotation schedule, or season of use will be made if allowable use standards are met. Cattle will be moved to the next scheduled pasture or off the allotment when these forage utilization standards are met. The option to return livestock to a pasture that has received adequate plant re-growth will be considered if all resource objectives can be met.

The maximum allowable use levels set for the Cox Canyon and Eagle Peak Allotments will be **35%**; in addition stubble heights should not be less than an average 3 inches on blue and hairy grama. Stubble heights not be less than 5 inches on sideoats grama, and no less than 6 inches on mountain muhly. Use of browse is not to exceed the **50%** level. Use levels will be monitored in key areas. The location of these is currently being verified. You are welcome to join us as we establish the permanent monitoring transects for gathering the stubble height data. Attached is a copy of our tentative monitoring plan for the **Cox Canyon and Eagle Peak**

Allotments for the 2003 grazing season. If you have any questions please feel free to contact Ted McArthur or Jerry Turner at the office (505) 533-6232.

The **Cox Canyon and Eagle Peak** Allotments includes Mexican Spotted Owl Protected Activity Centers (PAC). In these PAC's the following activities are restricted during the breeding season of the Owl (March 1-August 31): livestock concentrations or trailing, fence construction and maintenance, and livestock salting.

If utilization is found to exceed 35% and/or stubble height requirements at any time during the use period on any one key area, livestock must be removed from the key area, restricted area, pasture or allotment.

4. **Range Improvements:**

Fences: Please let us know if any fences are beyond reasonable repair and are in need of reconstruction.

Water: Advance planning is needed for authorizing tank cleaning so surveys can be scheduled during the summer months. If the pipelines and troughs are beyond reasonable repair, we are willing to work with you to replace them. Please protect natural springs and areas with riparian type vegetation. Drainage bottoms, creeks, springs, and cienegas, where water is available, are most susceptible to livestock concentrations.

5. **The Annual Operating Plan/Instructions** are a part of the Term Grazing Permit as provided for in Part 3, Section 8. It complies with the standards and guidelines found in the Forest Plan. It also complies with the Endangered Species Act as found in the Biological Assessment and/or on-going grazing consultation for the **Cox Canyon and Eagle Peak** Allotments. Any additional information collected during the year may be incorporated into the annual operating instructions.

This decision is subject to administrative review, pursuant to 36 CFR 251; and any appeal of this decision must be fully consistent with 36 CFR 251.90 (see enclosed copy of 36 CFR 251 regulations). In accordance with 36 CFR 251.84, if you file an appeal, I am willing to meet with you to discuss any concerns you may have with my decision. If you file an appeal, you may request an oral presentation in the appeal or at any time prior to closing of the appeal record (36 CFR 251.97). Additionally, if you file an appeal, you may request a stay of my decision in the appeal or at any time prior to closing of the appeal record (36 CFR 251.91).

A notice of appeal must be filed with Marcia R. Andre, Forest Supervisor, Gila National Forest, 3005 E. Camino del Bosque, Silver City, New Mexico, 88061-7863, within 45 days of the date of this decision. A copy of the notice of appeal must be filed simultaneously with Rogers M. Steed, District Ranger, Reserve Ranger District, at P.O. Box 170, Reserve, NM 87830.

Open and positive communications dealing with these or any other concerns is encouraged. Feel free to contact Ted McArthur or myself if you have any questions or problems. We will be happy to discuss allotment management, conditions on your allotments, Forest Plan standards and guidelines, or any other concerns you may have. ***We appreciate your management and the work you have already done in improving these conditions.***
